

Database Lab

Description

This laboratory is used for Database 1 and Database 2 labs. It has 16 PC units, where 15 units act as client, and only one PC plays the role of a server. Unlimited number of accounts can be created for students by accessing the server as *admin account*. Each client can establish connection to the server via username, password and hostname, and once the queries are running, all commands, tables, triggers, views, etc... will be saved automatically on the server.
