

# LabVIEW Academy

The LabVIEW Academy at PMU is the first such academy established in the Kingdom of Saudi Arabia. The purpose of the Academy is to offer training in LabVIEW graphical programming software and to prepare students and working professionals for the Certified LabVIEW Associated Developer (CLAD) exam.

The LabVIEW Academy program uses a blended learning model that combines face-to-face teaching with engaging content and hands-on lab exercises. This model prepares students for the demands of industry and higher education in engineering, computer science, and related fields.

The LabVIEW Academy at PMU is housed in the College of Engineering building. It has 25 PCs running the LabVIEW software. Training is conducted by qualified and experienced instructors who are certified by NI (CLAD).

## LabVIEW Academy Curriculum Package at PMU

- Instructor manuals for LabVIEW Core 1 and 2
- Instructor classroom slides for LabVIEW Core 1 and 2
- Instructor version of LabVIEW Academy Student Workbook
- Learning LabVIEW With NI ELVIS workbook and labs
