## DEGREE PLAN

## INTRODUCTION

A degree in finance provides the necessary background for a career in both the public and private sectors of the competitive job market. The program entails basic financial concepts and knowledge that serve as the foundation for both public policy and business decision-making activity. Career opportunities include financial planning, analysis, financial institutions, and treasury and investment functions in industry or government.

Sound financial thinking along with an understanding of the structure of the financial system and of financial tools is essential to the success of any organization. The program is designed to cover key finance areas including money and capital markets, corporate finance, measuring return on investment, financial planning and budgeting, capital budgeting, capital structure, cost of capital, dividend policy, investments, valuations, security analysis, and portfolio management. By its very nature, finance uses prerequisites in accounting, economics, statistics, and quantitative tools necessary in understanding a complex, global society.

Graduates will be prepared to work in different organizations and to eventually become vice president of finance, treasurer, controller or chief executive officer. The finance background could be one of the building blocks in many managerial and leadership positions. This program offers excellent preparation for students intending to study at the advanced degree level. Students are encouraged to earn professional finance certifications such as Certified Financial Planner or Chartered Financial Analyst.

## WHY FINANCE?

Finance professionals use analytical skills within an integrative process to formulate practical solutions to business problems as problems are multi-dimensional and an organization is a 'living' complex system, world in which modern businesses operate.

## PROGRAM OBJECTIVES

**The College of Business Administration and the Degree in Finance will provide a unique and distinguished academic unit that:**

- ↳ Prepares future finance professionals.
- ↳ Enriches and develops finance intellectual resources.
- ↳ Explores innovative instructional methodologies and technologies to provide the highest quality, most effective preparation for finance professionals.
- ↳ Establishing communication and the exchange of ideas

## PROGRAM OUTCOMES

- ↳ Assess a firm's financial situations and determine a firm's financing needs
- ↳ Demonstrate knowledge of investment theory and portfolio management
- ↳ Assess alternative business options using financial decision-making models that incorporate risk and uncertainty
- ↳ Explain relevant regulatory standards in investment, banking, capital budgeting, and other finance-related areas.
- ↳ Prepare and interpret financial statements for budgeting, reporting, compliance, auditing, and other financial decision-making purposes.
- ↳ Explain market economics from a domestic and a global perspective, and describe their effects on financial decision making.

## CAREER OPPORTUNITIES

**Potential careers of the Finance Graduate:**

- ↳ Certified Financial Planner
- ↳ Chartered Financial Analysis
- ↳ Financial Managers
- ↳ Venture Capitalist
- ↳ Investment Portfolio Management
- ↳ Chief Financial Officer
- ↳ Mergers and Acquisition Evaluator of Companies
